## WORK EXPERIENCE

**Front End Developer Intern** | ReactJS, CSS, HTML, Git, JSON  
Vosyn.ai

**Etobicoke, Ontario -Remote**  
February – May (**4 months**)

- Projected to handle over **1000+** users during the beta testing phase, ensuring robustness and scalability of the application.
- Implemented designs following Figma prototypes to maintain design **consistency** and **accuracy**, resulting in a **100%** increase in overall design fidelity.
- Applied **problem-solving** skills in **optimizing** page elements to **reduce** loading time and debugging code to ensure cross-browser usability.
- Ensured **responsiveness** of web applications across various devices and screen sizes.
- Developed **reusable components**, optimizing code **efficiency**, and fostering team productivity.

**Software Developer** | JavaScript, CSS, HTML, Bootstrap, Jira, Restful API, Tomcat  
Ever.Ag

**Windsor, Ontario**  
February 2023 – September 2023 (**8 Months**)

- Streamlined development of generic forms using **Object-Oriented Programming** principles, resulting in a **30%** increase in **efficiency** and **maintainability**.
- Developed **RESTful API** endpoints to facilitate clients in efficiently retrieving data.
- Contributed to the development of **ERP** and **CRM** software, enhancing **efficiency**, and streamlining processes for **20+** client organizations.
- Cut development time by **30%** through refactoring existing applications, ensuring **performance** standards were met while delivering **efficient** solutions.
- Proficient in implementing cutting-edge front-end styling techniques, utilizing **JavaScript**, **CSS**, and **Less** to create visually appealing and user-friendly interfaces.

## PROJECTS

**Movie Library Browse** | C#, NoSQL, Unit Testing, React.js, MongoDB, Postman, MVC

- Developed a movie browsing application using **C#**, **.NET**, **ReactJS** and **MongoDB** for a seamless end-to-end solution.
- Implemented **RESTful APIs** to optimize backend-to-frontend communication, focusing on data integrity and **performance**.
- Conducted rigorous **Postman** testing to ensure the reliability of APIs, resulting in a **bug-free** and robust application.

**Task Tracker** | HTML5, React, CSS3, MySQL, Express, Node

- Developed a task tracking app with a simple modern front-end design.
- Store tasks in **MySQL Workbench** using **SQL** queries.
- Sent requests from **React** to an **Express** server using **Axios** to **create**, **read update** and **delete** tasks in database.
- Using **insomnia** to test valid and invalid responses.

## EDUCATION

**University of Windsor**  
**Bachelor of Computer Science (Honours) – Applied Computing**  
**Certificate in Applied Information Technology**

**Windsor, Ontario**  
Sept 2018 – June 2022

## TECHNICAL SKILLS

**Technologies/Frameworks:** Git, Bootstrap, jQuery, Android Studio, phpMyAdmin, Visual Studios, React, Node, Express, MySQL, Oracle, Jira, Servoy, Azure devops, PostgreSQL, Confluence, Spring, RDBMS (Relational Database Management System), Tomcat, Postman, .NET

**Languages:** C, Java, HTML, CSS, PHP, JavaScript, SQL, C#, LESS, Python
