WORK EXPERIENCE

Software Developer   **Windsor, Ontario**
Ever.Ag   *February 2023 – Present*

- Contributed to the continuous development of **Enterprise Resource Planning** software, catering to a diverse client base of over **20+ organizations**. Resulted in significant **improvements** in **efficiency** and streamlined processes.
- Consistently delivered **high-quality** work, meeting deadlines, and ensuring prompt completion of tasks by leveraging **strong problem-solving** and **debugging skills**.
- Collaborated closely with team members in daily Scrum meetings, utilizing **Agile methodologies** to streamline project planning and improve communication and collaboration.
- Demonstrated strong teamwork skills through active engagement in **Pair Programming** sessions, effectively sharing knowledge and ideas to **boost productivity** and **code quality**.
- Proficient in implementing cutting-edge front-end styling techniques, utilizing **JavaScript**, **CSS**, and **Less** to create visually appealing and user-friendly interfaces, while adhering to modern design principles.
- Developed **RESTful API** endpoints to facilitate clients in efficiently retrieving data
- Leveraged **Object-Oriented Programming** principles to streamline the development of generic forms, resulting in increased **efficiency** and **maintainability** of form-based applications.

PROJECTS

Bookstore Application | *C#, Microsoft Server SQL, Unit Testing, Azure Devops, Agile*
- Developed Native Windows App with industry best practices in software design
- Modern UI design with a Windows 10 design-like approach
- Used industry standards in using **Azure servers** and tools
- Contributed to **agile and sprint meetings to track progress** and simulate industry software projects

Employee Manager | *Java, DynamoDB, Spring, AWS, NoSQL, MVC*
- Establish connection to **AWS DynamoDB** to store data.
- Implement **Object Oriented Programming** concepts to make application innovative and easier to manipulate in different classes.
- Performed various tests using **Insomnia** to **create, read, update, and delete** Employees in the database, like a **RESTful API.**

Task Tracker | *HTML5, React, CSS3, MySQL, Express, Node*
- Developed a task tracking app with a simple modern front-end design
- Store tasks in **MySQL Workbench** using **SQL** queries
- Sent requests from **React** to an **Express** server using **Axios** to **create, read, update, and delete** tasks in the database.
- Using **Insomnia** to test valid and invalid inputs.

EDUCATION

University of Windsor   **Windsor, Ontario**
Bachelor of Computer Science (Honours) – Applied Computing   *Sept 2018 – June 2022*
Certificate in Applied Information Technology
